

Modell		
Digisat		

Eigenschaften

- input frequency 950-2150 MHz
- Very sensitive, easy to maximize weak and strong signals
- Offset adjustment (attenuation)
- Built in volt /mA-meter, 10-20 volt, 0-500 mA
- 22KHz indication on LED
- Powersupply through receiver or external DC. power 12-20 volt
- Short circuit protection with automatic fuse
- F-connectors
- CE-approved
