

Maximum A/V Link System III, extra receiver

Extra receiver unit for Maximum A/V Link System III

Frequency range

Receiver: 2400 MHz ~ 2483 MHz

Channel number

Receiver: 4 (2414, 2432, 2450, 2468 MHz)

Frequency stability:

+/- 100 KHz

L.O. Stability:

+/- 100 KHz (Typ.)

Video level

Output: 1 Vp-p (Typ.)

Audio level

Output: 1 Vp-p (Typ.)

Sensitivity

Receiver: -85 dBm

Supply voltage

Receiver: 9V

Power consumption

Receiver: 200 mA (Typ.)

Antenna

Receiver: Dipole

Operating temperature

Receiver: -10°C - +60°C

Dimensions (W x H x D):

Receiver: 41 x 115 x 102 mm

- Antenna embedded
- Remote control the A/V source with IR Extender
- Low power consumption
- NTSC/PAL video format available
- Compact size with streamlined shape design
- 4 selectable channels and Auto scan (Dip switch)
- Range up to 300 feet
